---

Major Winter Storm forecast for North Algona Wilberforce.

Heavy snowfall and high winds are imminent for the next twenty hours. Residents are advised not to travel unless absolutely necessary. More than 30 centimetres are possible overnight with winds up to 60 kilometres per hour.

Public Works crews are scheduled to start plowing snow at 3am unless conditions change. Motorist are asked to be patient as heavy snow will slow progress considerably. Crews will respond to emergency calls from fire, ambulance or police as required.

Residents are asked not to park on roadways or to push snow onto the travelled portion of the road. The practices make clearing difficult and poses a danger to vehicular traffic.

Stay inside tonight, keep warm and ensure you have emergency supplies such as flashlights close at hand. Often there can be Hydro failures with high winds and heavy snow loads.
